Change - Down
Pricing variability in market

Definitions and explanation

Price (\$/mt ex GST)

Price based on bulk loads per metric tonne excluding goods and services tax

DM

Dry matter (DM)

MJ ME

Metabolisable energy (ME) measured in Megajoules (MJ) per kg DM

CP

Crude Protein content (CP) measured in units per kg DM

NDF

Neutral Detergent Fibre (NDF) measured in unites per kg DM

\$ per nutrient unit

Calculated dollar value of the nutrients contained within a feed. A higher value indicates higher cost per nutrient unit

Product	Nutrient Content (units per kg drymatter (DM))

Standard Commodities	02 9339 8400

Brief Commentary;

Suppliers and traders are continuing to experience very low demand for commodities other than grain and protein meals. Despite this lack of demand list prices for many commodities have only slightly fallen over the previous few weeks. However, actual prices offered by some suppliers may be less than the list price and reflect their need to reduce stock positions. Commodities highlighted in blue could have price ranges of \$10-20/mt up or down from the published price included in the table. The Australian dollar remains weak at 0.656 and is supporting pricing for imported products like soybean meal. Canola meal on the other hand has maintained a relatively soft position for prompt and spread options.
