Pricing variability in market

Definitions and explanation

Price (\$/mt ex GST)	Price based on bulk loads per metric tonne excluding goods and services tax
DM	Dry matter (DM)
MJ ME	Metabolisable energy (ME) measured in Megajoules (MJ) per kg DM
CP	Crude Protein content (CP) measured in units per kg DM
NDF	Neutral Detergent Fibre (NDF) measured in unites per kg DM
\$ per nutrient unit	Calculated dollar value of the nutrients contained within a feed. A higher value indicates higher cost per nutrient unit

Product	Nutrient Content (units per kg drymatter (DM))					
	DM %	ME MJ	CP %	NDF %	Sugar %	Starch %
Almond Hulls milled	90%	10.0	5%	35%	34%	1%

Standard Commodities	02 9339 8400

Brief Commentary;

Significant weakening of the Australian dollar to \$0.6018 (near 10% relative fall in the last week) has caused a major increase in costs for imported products

Imported soybean meal solvent and dried distillers grain pricing has risen more than \$40/mt due to weakened AUS\$ and other international forces

Canola meal on the other hand has maintained a relatively soft position for prompt and forward delivery options.

Canola meal solvent is currently priced at a significant discount per unit of protein relative to other protein meals.

Imported drought feeds continue to see low demand & trading volumes but despite these negative forces the price remains firm being partially supported by the weekend Aus\$

There remains some significant variability in pricing from different parties and this reflects individual traders needs to reduce stock positions and therefore offer prices less than that listed

Commodities highlighted in blue could have price ranges of \$10-20/mt up or down from the published price included in the table

Spot loads of products like millrun have been available at discounted prices and reflect the lack of demand and manufacturers need to move such by-products

Traders and logistics companies involved in the supply of commodities have at this stage noted no current impacts due to COVID-19 related issues
