Change - Down
Pricing variability in market

Definitions and explanation

Price (\$/mt ex GST)

Price based on bulk loads per metric tonne excluding goods and services tax

DM

Dry matter (DM)

MJ ME

Metabolisable energy (ME) measured in Megajoules (MJ) per kg DM

CP

Crude Protein content (CP) measured in units per kg DM

NDF

Neutral Detergent Fibre (NDF) measured in unites per kg DM

\$ per nutrient unit

Calculated dollar value of the nutrients contained within a feed. A higher value indicates higher cost per nutrient unit

Product	Nutrient Content (units per kg drymatter (DM))

Brief Commentary;

Market instability continues despite the Australian dollar remaining relatively steady and finishing today slightly stronger at \$0.6124USD

Soybean meal has fallen from the \$800's last week to \$765 per mt ex brisbane today

Canola meal has remained steady for the week and pricing fairly consistent among suppliers

Grain prices have rallied significantly in the last week with April downs prices for Wheat and Barley around \$500 and \$410 respectively

Despite these large rises in grain pricing a total lack of demand for drought like feeds has increased supply and put some downward pressure on pricing

Significant market variability remains with different traders selling at significantly different prices, reflecting their needs to reduce stock positions and therefore offer prices less than that listed

Commodities highlighted in blue have price ranges of \$10-30/mt up or down from the published price included in the table

There is significant price variation in listed price and available pricing (+/- \$40/mt) for dried distiller grain for April

As winter approaches there is usually an increase in demand/pricing of byproduct feeds however low cattle numbers and market uncertainty are arising as negative forces on demand and pricing

There appears to be some concern over the potential impact of COVID-19 on supply capacity of some mills supplying imported products (eg Palm kernel, Soybean Hull etc)

Any potential interruptions on imported products would not likely impact the local market for some months as current stocks and pipeline are normal

On the domestic front there continues to be no reported interruption to logistics networks from COVID-19
